

GRAFFITI-GARD®

PERMANENT AND SACRIFICIAL ANTI-GRAFFITI COATINGS

- **GRAFFITI GARD® IV Low Luster** - TEX·COTE®'s GRAFFITI GARD® IV Low Luster is a permanent, two-component, water-based high-performance clear aliphatic urethane hybrid coating that resists graffiti from a variety of materials including spray paints and marking pens. In many cases, freshly applied wet spray paint/ink will actually crawl back on to itself, frustrating the would be tagger into stopping and moving on to another target. The slick surface is easy to clean with graffiti removing cleaners such as TEX·COTE® "Biodegradable Graffiti Remover" followed by power washing. TEX·COTE®'s GRAFFITI GARD® IV is also available as a high gloss coating with the same anti-graffiti properties. Abrading the surface with light sanding or steel wool is necessary prior to repainting GRAFFITI GARD® IV surfaces.
- **GRAFFITI GARD® S** - TEX·COTE®'s GRAFFITI GARD® S is a permanent, one-component, ready-to-use high performance polysiloxane hybrid coating that resists graffiti from a variety of materials including spray paints and marking pens. In many cases, freshly applied wet spray paint/ink will actually crawl back on to itself, frustrating the would be tagger into stopping and moving on to another target. The slick surface is easy to clean, in most cases, with a simple power washing. Depending on the age of the graffiti, graffiti removing cleaners such as TEX·COTE® "Biodegradable Graffiti Remover" may be necessary, followed by power washing. GRAFFITI GARD® S has a VOC of 240 g/L, so may not be available in certain areas due to local regulations. It is not available in California's SCAQMD district.
- **SACRIFICIAL GRAFFITI GARD®** - TEX·COTE®'s SACRIFICIAL GRAFFITI GARD® is a specially formulated and blended water-based resin for optimum performance as a protective sacrificial system over new or previously painted substrates. Sacrificial GRAFFITI GARD® may be removed with a hot water blaster with water temperatures of 170°F - 180°F.

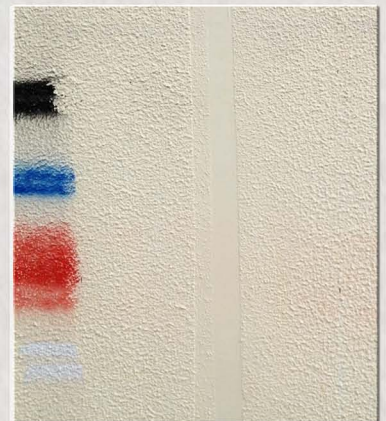

Spray paint graffiti applied to surface with GRAFFITI GARD® IV Low Luster.

GRAFFITI GARD® Biodegradable stripper applied one week after graffiti application.

Graffiti removal using power washer.

Clean surface after removal of graffiti.
