A proprietary mixture consists of low toxicity components. The identities of the components are trade secret (29CFR 1910.1200 (i) and are available to physician or paramedical personnel in emergencies.

### Section 4: FIRST AID MEASURES

**Eye Contact:** In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Use lukewarm water if possible. Use fingers to ensure that eyelids are separated and that the eye is being irrigated. Then remove contact lenses, if easily removable, and continue eye irrigation for not less than 15 minutes. If irritation persists, get medical attention.

**Skin Contact:** In case of contact, immediately remove contaminated clothing and shoes. Wash off skin with soap and water. Get medical attention if irritation develops and persists.

**Inhalation:** If breathed in, move person into fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention.

**Ingestion:** DO NOT induce vomiting. If victim is conscious and alert, give 2 cupful of water. Wash mouth out with water and keep at rest. Never give anything by mouth to an unconscious person. Seek medical attention or call poison control immediately.

**General Advice:** In case of accident or if you feel unwell, seek medical advice immediately. (Show the label or SDS where possible).

**Protection of Firefighters:** Keep upwind of fire. Wear full fire fighting turn-out gear (full Bunker gear) and respiratory protection (SCBA).

**Unusual Fire/Explosion Hazards:** Closed container may forcibly rupture under extreme heat or when contents are contaminated with water (CO<sub>2</sub> formed). Use cold-water spray to cool fire-exposed containers to minimize the risk of rupture. Large fires can be extinguished with large volume of water applied from safe distance, since reaction between water and hot diisocyanate can be vigorous.

## Section 6: ACCIDENTAL RELEASE MEASURES

**Personal Precautions:** Use personal protection recommended in Section 8. Isolate the hazard area and deny entry to unnecessary and unprotected personnel.

**Environmental Precautions:** Keep out of drains, sewers, ditches, and waterways. Minimize use of water to prevent environmental contamination.

**Methods for Containment:** Contain and/or absorb spill with inert material (e.g. sand, vermiculite), then place in a suitable container. Do not flush to sewer or allow entering waterways. Use appropriate Personal Protective Equipment (PPE).

**Methods for Clean-Up:** Scoop up material and place in a disposal container. Provide ventilation

**Other Information:** Not available.

## Section 7: HANDLING AND STORAGE

**Handling** Avoid contact with skin and eyes. Do not swallow. Do not breathe gas/fumes/vapor/spray. Handle and open container with care. When using do not eat or drink. Wash hands before eating, drinking, or smoking.

**Storage** Keep out of the reach of children. Keep container tightly closed. Store in a cool place. Keep from freezing.

## Section 8: EXPOSURE CONTROLS / PERSONAL PROTECTION

**Exposure Guidelines**

**Exposure Limits:** Contains no substances with exposure values

**Engineering Controls:** Use ventilation adequate to keep exposures (airborne levels of dust, fume, vapor, etc.) below recommended exposure limits.

**Personal Protective Equipment:**

**Eye/Face Protection:** None required with normal use; however eye protection is always recommended. Wear protective safety glasses with unperforated side shield during use. Refer to 29 CFR 1910.133, ANSI Z87.1.

**Hand Protection:** Wear suitable gloves. Gloves should be impermeable to chemicals and oil. Breaking through time of selected gloves must be greater than the intended use period.

**Skin and Body Protection:** Wear suitable protective clothing.

**Respiratory Protection:** None required with normal use. In case of insufficient ventilation, wear suitable respiratory equipment.

**General Hygiene Considerations:** Handle according to established industrial hygiene and safety practices
