TEX-COTE™s STONE-TEX™ System is a combination of a water or solvent-based textured coating and a 100% acrylic latex splatter coat(s) that simulates the look of granite, marble sandstone or stone. This system is ideal for accenting areas such as window trim, infill panels, wainscoting and the like. In conjunction with any of TEX-COTE™s High Performance textured coatings the STONE-TEX™ System can dramatically enhance the aesthetics of your building at an economical cost.

- Resists moisture
- Provides excellent color retention
- Hides minor surface imperfections
- Provides cost-effective design flexibility
- Specially formulated for cementations or masonry construction
- Environmentally friendly, low VOC (Volatile Organic Content), low odor
- Available in standard colors shown (custom colors on request)

The Possibilities Are Endless.
